## SUMMARY

Dedicated and results-driven Backend Developer with 3 years of experience specializing in PHP and Laravel. Proficient in building scalable SaaS platforms, CRM systems, and custom e-commerce integrations, particularly in the Shopify ecosystem. Skilled in architecting applications from scratch, integrating third-party APIs, and delivering high-quality backend systems. Proven ability to manage multiple part-time freelance projects while maintaining consistent performance and clean code.

## EXPERIENCE

### Laravel Developer
**HashSoftware**                                                                                               **Oct 2023-Present**
• Led backend development for BehaviourLink, a CRM telemedicine platform for clinics.
• Architected clinic onboarding, appointment scheduling, and service modules from scratch using Laravel.

### PHP Developer
**Technaitra**                                                                                               **June 2023 - Sep 2023**
• Developed admin and client features for an HRM system using Laravel and MySQL.
• Collaborated closely with UI/UX teams to translate requirements into responsive and secure components.

## PROJECT

### Forge Speakeasy
app.forgespeakeasy.com
• Implemented robust backend architecture for Forge Speakeasy using Laravel, applying MVC principles and secure authentication techniques.
• LinkedIn API integration for login and connection management, including storage, requests, and feedback.

### Bayadesk
bayadesk.com
• SaaS platform with Super Admin, Client, and User modules.
• Integrated Shopify API for order syncing.
• Added WhatsApp Signup Flow for automated customer interaction.

### BehaviourLink
behaviour-link.hsdevbox.com/
• Created and deployed clinic onboarding, appointment scheduling, and service modules utilizing Laravel and MySQL, facilitating seamless system expansion for multi-clinic operations.
